Supplied software

Product Recovery Program

Product Recovery Program enables you to restore the complete contents of your hard disk to the same state as it was when originally shipped from the factory. Product Recovery Program operates independently of the Windows® operating system, so you can perform a recovery operation even if you cannot start Windows. To learn more about the program, see the help for the program.

If recovery discs are shipped with your computer, the program is not supplied. Use the recovery discs for recovery instead.

Application Launcher

The Application Launcher provides quick access to common and frequently used applications.
